**You**

Considerando estew primeiro script que se chama Redis Client.js => const redis = require('ioredis');
const crypto = require('crypto');

```
class RedisClient {  
  constructor() {  
    this.client = this.createClient();  
    this.client.on('error', (error) => {  
      console.error('Erro na conexão Redis:', error);  
    });  
  }  
}
```

```
createClient() {  
  return redis.createClient({  
    host: '127.0.0.1',  
    port: 6379,  
    legacyMode: true  
  });  
}
```

```
async ensureRedisClient() {  
  if (this.client && this.client.connected) {
```
